1. A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.					
2. The proposed amendment(s) will not be entered because:					
(a) ⊠ they raise new issues that would require further consideration and/or search (see NOTE below);					
(b) ⊠ they raise the issue of new matter (see Note b					
(c) they are not deemed to place the application in issues for appeal; and/or	·	rially reducing or simplifying the .			
(d) they present additional claims without canceling a corresponding number of finally rejected claims.					
NOTE: See Continuation Sheet.					
3. Applicant's reply has overcome the following reject	tion(s):				
4. Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).					
5. The a) affidavit, b) exhibit, or c) request for reconsideration has been considered but does NOT place the application in condition for allowance because: See Continuation Sheet.

Continuation of 2. NOTE: The proposed amendment adds to the claim that the second dispersion "creates anchor points between the braided layer and the inner layer". This is not only a new issue requiring further search and/or consideration but also appears to be new matter as there is no description in the original disclosure of the creating of such "anchor points" with the second dispersion. The amendment therefore does not simplify the issues on appeal. Applicant is additionally advised that status identifiers employed for claims 23-26 should be "(previously presented)" and NOT "(previously added)".

Continuation of 5. does NOT place the application in condition for allowance because: The declaration and/or affidavit is not signed and therefore it has not been considered. Applicant is advised that the proposed amendment removed the language relating to the flexibility of the hose and thus the proposed amendment would overcome the 112 first paragraph rejection based upon the same. The applicant is additionally advised that the description of the E.P. as a single dip method in the declaration is not completely understood as there is no dipping involved in the operation, rather the fibers are precoated prior to application of the same to the mandrel (which is not described as including a subsequent dipping operaion). As such, it is not at all clear whether applicant is comparing the closest prior art to the claimed invention in the declaration. The declaration has not been further reviewed as it lacks a signature.
